Ear cover patch · لزقة الأذن الكاملة

New product concept — covers the whole outer ear; adhesive rim seals on the skin around it. Nothing goes inside the ear. For factory prototyping.

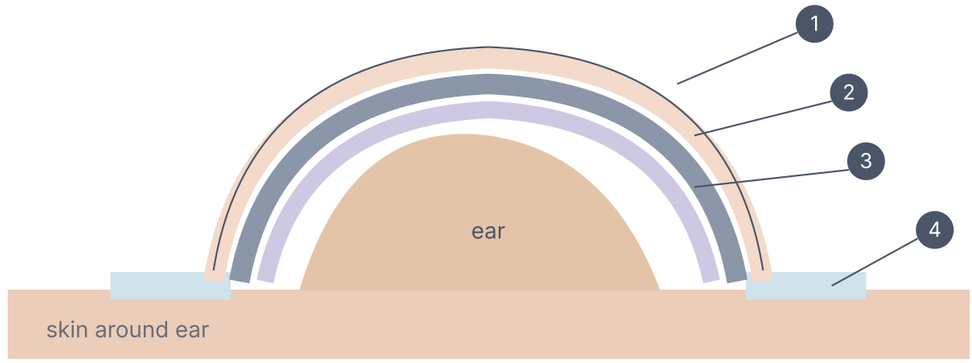

relieve.

TOP VIEW · SHAPE

- Ear-shaped cover over the whole outer ear; the ear sits inside a low dome and is not pressed flat.
- Sizes (outer): S 52×72 · M 58×80 · L 64×88 mm — to be refined on samples (adult ear length ≈ 55–70 mm).
- Left / right mirrored pair. Pull tab for painless removal; pebble mark embossed top right.

CROSS-SECTION · 4 LAYERS

1. **Soft outer foam / fabric** (1–1.5 mm): comfortable on the pillow when sleeping on the side.
2. **Dense, flexible mass layer** (1.5–2 mm, high-density silicone / TPE), pre-formed as a low dome: the part that blocks sound.
3. **Soft acoustic foam liner** inside the dome: absorbs sound and cushions the ear so it is not pressed.
4. **Medical silicone-gel adhesive rim** (8–10 mm, skin-safe, latex-free) on the skin around the ear: airtight seal, painless removal, gentle on fine hair.

ASK THE FACTORY TO SAMPLE 3 VERSIONS

- **A** — light: thin mass layer, most comfortable.
- **B** — standard: balance of comfort and noise reduction.
- **C** — max block: thicker mass layer + thicker liner.

Target: re-usable 3–5 nights, breathable enough to avoid moisture build-up, no residue, hypoallergenic. Please provide a lab attenuation test (SNR/NRR) on the chosen version before we print any number on packaging.

COLOURS

- Skin light
- Skin tan
- Mist (brand)
- Night (brand)

RISKS TO CHECK ON SAMPLES

- Rim must seal on skin, not on hair: check the hairline behind/above the ear; may need a shaped rim or a hair-friendly gel.
- Pressure on the ear when sleeping on the side → dome height must keep the ear free. Test on real users, both sides.
- Heat and sweat under a full cover overnight → check skin and comfort after 8 h; consider a breathable outer layer.
- Must not be used by young children (choking / removal) — label accordingly.
- Will reduce noise less than deep-fitting foam plugs or earmuffs; the promise is **comfort + less noise**, not silence.
